Strided multiplication: approximately fixed address span
float, scalar
float, native auto
double, scalar
double, native auto
Combined span ≈ 0.09375 MiB float / 0.1875 MiB double
Combined span ≈ 1.5 MiB float / 3 MiB double
Combined span ≈ 24 MiB float / 48 MiB double
Combined span ≈ 384 MiB float / 768 MiB double
Useful bandwidth (GiB/s)
Stride (elements)
Median of 7 trials; bars show min–max, not confidence intervals. Useful bytes = 3 × N × sizeof(T).
